The Action Printech FTP Site Information

action

printech, inc.

Location:	ftp://actionprintech.com
User Name:	ftp47044663-0
Password:	action1

Our FTP site allows large files to be uploaded and stored by customers until we retrieve them and vise versa. All files must be compressed with either Stuffit or Zipit before uploading. All login information is case sensitive. The site has a maximum capacity of 2 gigabytes.

Please see our artwork requirements and capabilities info on our website **before** uploading any files to the FTP site. This will avoid any undue delays as a result of file incompatibility.

Once you have uploaded all desired files to the site please send an e-mail to your customer service representative as well as our Graphics Department (randy@actionprintech.com) notifying us that the files are ready and available for download.

If you would like to utilize the FTP site but do not have software that allows you to upload/download The Action recommends the application WISE FTP if you use a PC. WISE It can be found at **www.wise-ftp.com**. If using a Mac we recommend Cyberduck FTP. Cyberduck can be found at http://cyberduck.ch.
